How to Reach a “Blocked” Website !

First find a “proxy server.” Simply search the internet for “proxy servers”. (Even a good proxy server might not work later. Therefore, learn how to find them. For these instructions, we will use an actual proxy server in Taiwan with the technical specs “address 139.223.199.194” and “port 8080”.)

Then proceed as follows:

1. Go to SETTINGS.
2. Go to CONTROL PANEL
3. Go to INTERNET
4. Check “proxy server”
5. Enter address – 139.223.199.194
6. Enter port – 8080

That’s it!

Fight Censorship !

The Internet community is urged to save and distribute these anti-block instructions!

Webmasters of “vulnerable” websites are urged to put these instructions on their websites AND to urge their visitors to download and save them *immediately* – BEFORE the website is blocked and it is *too late* to tell them!

SAVE AND DISTRIBUTE!!!

Proxyservers

Bulgaria 195.24.55.245 Porto 8080; France 195.242.79.21 Port 8080; Columbia 209.88.62.76 Port 8080; Taiwan 139.223.199.194 Port 8080; USA Interlog.com 207.34.202.2 Port 3128 & Home.com 24.112.47.107 Port 8080
